

## Homework Help – Flashcard Match Game

Dear Parents:

Below you will find ideas for creating flashcards that you can use to help your child learn vocabulary in both English and your native language.

1. Make a list of words for the set of flashcards that you will be creating. You can create multiple sets, each with a different theme.
2. Use an online translation site, such as Google translate, to translate the words into English, if necessary.
3. Find a picture for each word in the list. You may use picture that you cut from magazines or newspapers, or you can use an online search site, such as Google, to find pictures that you can print.
4. Print the grid page provided.
5. In the column on the left, write the words in English.
6. In the middle column, paste the pictures that go with the words on the left.
7. In the column on the right, write the words in your native language.
8. Next, cut out the squares to make cards. You will have 3 cards for each word on the word list.
9. Print out a blank copy of the grid page. Leave this page uncut.
10. Mix up the cards and then have your child match the words and pictures that go together, using the blank grid page as a “game board”.
11. After your child matches the pictures and words, have them read both the words in both English and your native language.

Ask your child’s teacher what themes will be covered during the school year. Some possible themes for card sets:

### 3<sup>rd</sup>, 4<sup>th</sup> & 5<sup>th</sup> Grade

Amphibians

Government

Music

Ecology

Insects

Reptiles

Geography

Mammals

Space

### Resources

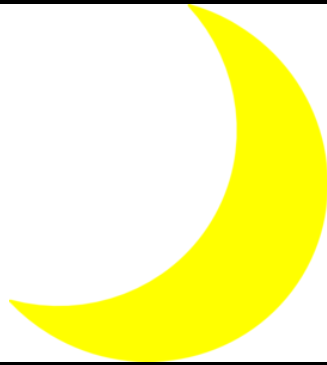

- Search engines, such as [google.com](http://google.com)
- Online translation sites, such as [translate.google.com](http://translate.google.com)
- Online image search sites, such as [images.google.com](http://images.google.com)
- Multilingual Dictionaries
- Magazines and newspapers for pictures

Sample: Space

Sun

Moon

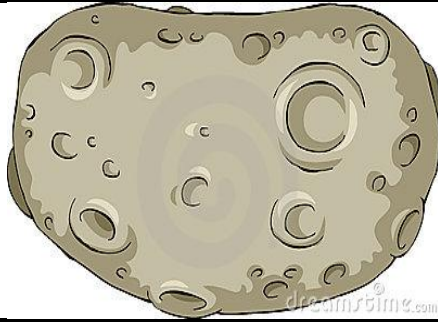

Earth

Sample: Space

Asteroid

Shooting  
star

Telescope

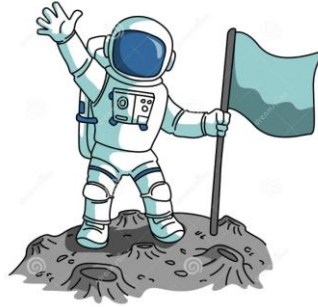

Sample: Space

Star

Astronaut

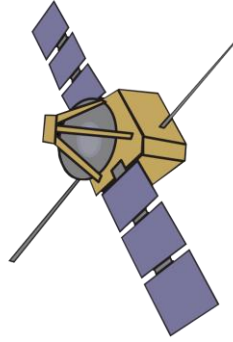

Rocket

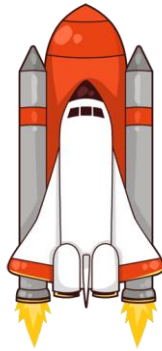

Sample: Space

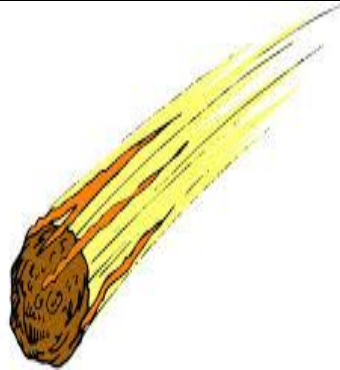

Satellite

Space  
Shuttle

Meteor
